

I feel that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved my time at home, by not interrupting my day. I have had to work the off shift at work and getting unwanted calls from telemarketers during the day is horrible when you can't get back to sleep and then have to go in and work an off shift..

When I moved to my new house this summer I was suprized when I started receiving these annoying calls again. A friend had to tell me over lunch that since my number has changed, I needed to re-register, I did this ASAP. This is a great service provided by the state of Indiana and greatly appreciated..

I wish we could do the same with the annoying pronos / mortgage email garbage I receive. I receive more garbage email than personal emails, lately.

Thanks for your continued support of this law.. Don.
